FQ30 FIBER LASER MARKER

Based on Telesis' robust and field-proven FQ10 and FQ20 design, the FQ30 provides a higher power alternative for more demanding applications.

FEATURES

- Continuous wave average power of 30W provides even faster cycle times and/or deeper engraving
- Easily integrated, utilizing 110/230VAC power and with no cooling water required
- Remote pump diode design for an extremely small footprint – great for both manual off-line and automated on-line applications
- Very high speed scan head with optional Marking On The Fly (MOTF) configurations for high volume applications.
- Extremely dependable design with best-in-class pump diode reliability
- Configurations available providing Dual Shutter Sensor feature as required by many automotive and medical device applications
- Intuitive graphical **MERLIN**[®] II LS marking software with major international language support through Windows
- Includes visible red aiming diode
