IdentiPlate® DPP2000
DATA PLATE PRINTER

The fast, flexible DPP2000 automatically feeds and prints metal data plates in a wide range of sizes and thicknesses. This fully programmable, table-top unit prints multiple character sizes from .03″ to 4.00″ (.76 to 101.6mm) on a single plate using Telesis' patented, low maintenance floating pin technology. Marking pattern design is quick and easy with DPP2000 user-friendly software.
FEATURES

- Character height programmable from .03″ to 4.00″ (.76 to 101.6mm)

- Dot matrix or continuous line characters

- Compact, table-top design

- Easily adjustable plate feed magazine accommodates plate sizes from 3/4″ x 1-1/4″ (19 x 31mm) to 4″ x 5″ (101 x 127mm) and thicknesses from 0.02″ to 0.07″ (.05 to 1.7mm)

- Automatically feed up to 250 data plates per batch (varies with plate thickness)

- No expensive tooling to wear out

- Long lasting, inexpensive, pneumatically driven marking pin is easy to replace

- Stores up to 75 patterns for instant access. No need to repeat pattern setups

- RS232/485 serial port for data entry via optional Bar Code Scanner or Host Computer

- Rugged data entry terminal with four-line LCD display

- Automatic serialization, date and shift coding, including user defined codes

- Discrete I/O for START PRINT, ABORT, PRINTING, and DONE signals

OPTIONAL ACCESSORIES

- Choose VS2000 software to backup, design and edit patterns on a personal computer

- Bar code scanner for data entry

- Restacker neatly and auto-matically stacks data plates after marking

- Pre-load additional plate feed magazines for nearly continuous operation

Compact TMC420 Controller features 4-line LCD Display — no PC required.

Features DATA MATRIX™ 2-D Code Marking Capability — Meets all Department of Defense UID Requirements
